

HumaSens2.0

Glucose Meter

Safety and Convenience at its Best

- > Results in only 5 seconds
- > Works with only 0.7µl capillary blood
- > Safe and easy to use

HumaSens2.0

Glucose Meter

Safety and Convenience at its Best

- › Strip ejector to minimize infection risk
- › Works with large hematocrit range
- › Large memory and averaging functions
- › Strip and control with long shelf life

Easy handling

- › Symmetric meter design – can be used with either hand
- › Intuitive user operation - only two buttons
- › Large character display – easy to read
- › Clear display icons – necessary information at a glance

Convenience and economy

- › Only 0.7 µl sample volume
- › Results in only 5 sec
- › Long-lasting battery (1,000 results)
- › Automatic switch-on and off

Reliability and safety

- › Results comparable to laboratory testing
- › Adjustable lancing device penetration depth
- › Easy coding with code card

Glucose Test Strips Blue

Technical Data

Technology	Electrochemical biosensor
Sample	Fresh capillary whole blood
Measurement range	20–600 mg/dl (1.1–33.3 mmol/l)
Battery lifetime	Approx. 1,000 results
Memory	360
Temperature range	10 ... 40 °C
Altitude range	Sea level – 10,000 ft (3,250 m)
HCT range	25–60 %
Measurement time	5 sec
Sampling volume	0.7 µl
Calibration	Plasma calibrated
Shelf life (strips)	24 months
Shelf life (controls)	16 months
Open vial stability (strips)	3 months
Open vial stability (controls)	3 months

Ordering Information

	Languages	Unit/Size	REF
HumaSens Starter Pack	GB, D, F, E	1 pack	17560

Reagents

Glucose Test Strips Blue HumaSens2.0/HumaSens2.0 ^{plus} /HumaSens/HumaSens ^{plus}		
	2 x 25 pcs	17562
	1 x 10 pcs	17562 /2
Glucose Control HumaSens2.0/HumaSens2.0 ^{plus} /HumaSens/HumaSens ^{plus}		
(Blue Glue Strip)	2 x 2 ml	17562/10

Consumables

Lancets	100 pcs	17543
Lancing device	1 pc	17544
